## JAPAN

### BONSAI(盆栽)

Written by : Eichi Katai

"Bonsai"(盆栽) literally translated, means" Tray Planting" is a traditional Japanese horticultural artform of growing trees and shrubs in miniature in tray or pot."Bonsai" is not just artform to decorate rooms or enjoying watching. People enjoy to grow own tree and produce own art work.

Origin of "Bonsai" go back to 6th Century China, "Penjing" Art (produce entire nature scenes in small tray) which imported into Japan and localised and grow with Japanese Zen culture. It is not just growing miniature size tree in the pot, more to create and condensate realistic nature.

Most unique point of this artform is that this is a mixture of horticultural practice and art. Use Horticultural technique to grow and care your tree, use Bonsai art technique (trimming, clamping, grafting etc) to express your sense of art to one tree. One Important fact is that not like painting or sculpture, there is no Completion in "Bonsai" because it is using living tree. Master pieces of Bonsai are usually more than 100~300 years old and oldest Bonsai in the World is presumed to more than 1,000years. One of over 1,000 years Bonsai is displayed in "Crespi Bonsai Museum" in Milan, Italy. This lifelong art attract not only Japanese, but to World widely.
